

SpaceX IPO

FULL ENGLISH TRANSCRIPT

It is certainly hard to believe that a little company that started in a warehouse in El Segundo is now going public with the largest IPO ever. And let me tell you, if people had told me this was going to happen, I was like, 'man, you must be smoking some really good crack,' because I thought this company was going to fail.

I mean I gave SpaceX less than a 10% chance of succeeding at all. I said, 'Look, we're probably going to fail, but you know, we should give it a try, because if we don't, if there's not a new company that enters space, we will never be a truly space-faring civilization.'

You know, while the other aerospace companies, they build good rockets and everything, they were simply not pursuing the technology that's necessary to make life multi-planetary. And that's what SpaceX is all about, is to take the fiction out of science fiction and create an exciting, inspiring future for everyone.

We want to be able to take anyone who wants to go to the moon, anyone who wants to go to Mars, or anywhere in the solar system. Not just a few astronauts. I mean, you—literally you. Whoever you are watching this, SpaceX wants to be able to take you to the moon, take you to Mars, and ultimately beyond.

There are always problems on Earth. There are always things that we wish to be better, that we want to solve here on Earth, and we should solve them. But there also have to be things that get you excited about the future, that make you glad to wake up in the morning because you can't wait to see what happens next.

And that's the future that SpaceX wants to bring to you.

SpaceX IPO

SENTENCE BY SENTENCE

It is certainly hard to believe that a little company that started in a warehouse in El Segundo is now going public with the largest IPO ever.

确实很难相信，一家在埃尔塞贡多仓库起步的小公司，现在竟然以史上最大的IPO上市了。

And let me tell you, if people had told me this was going to happen, I was like, 'man, you must be smoking some really good crack,' because I thought this company was going to fail.

让我告诉你们，如果以前有人告诉我这一切会发生，我肯定会说，“老兄，你一定是抽了极品冰毒吧”，因为我曾认为这家公司注定会失败。

I mean I gave SpaceX less than a 10% chance of succeeding at all.

我是说，我给SpaceX的成功率估计不到10%。

I said, 'Look, we're probably going to fail, but you know, we should give it a try, because if we don't, if there's not a new company that enters space, we will never be a truly space-faring civilization.'

我说，“听着，我们很可能会失败，但你知道，我们应该试一试，因为如果我们不尝试，如果没有一家新公司进入太空，我们将永远无法成为一个真正的太空文明。”

You know, while the other aerospace companies, they build good rockets and everything, they were simply not pursuing the technology that's necessary to make life multi-planetary.

你知道，虽然其他航空航天公司建造了优秀的火箭等一切，但他们根本没有去追求实现多行星生活所必需的技术。

And that's what SpaceX is all about, is to take the fiction out of science fiction and create an exciting, inspiring future for everyone.

这就是SpaceX的宗旨，即让科幻小说脱离虚构，为每个人创造一个令人兴奋、鼓舞人心的未来。

We want to be able to take anyone who wants to go to the moon, anyone who wants to go to Mars, or anywhere in the solar system. Not just a few astronauts.

我们希望能带上任何想要去月球、想要去火星或太阳系任何地方的人，而不仅仅是少数宇航员。

I mean, you—literally you. Whoever you are watching this, SpaceX wants to be able to take you to the moon, take you to Mars, and ultimately beyond.

我是说，你——确实就是你。无论你是谁，只要你在看这段视频，SpaceX都希望能带你上月球，带你上火星，并最终去往更远的地方。

There are always problems on Earth. There are always things that we wish to be better, that we want to solve here on Earth, and we should solve them.

地球上总是有问题。总有一些我们希望变得更好的事情，一些我们想在地球上解决的问题，我们也确实应该去解决它们。

But there also have to be things that get you excited about the future, that make you glad to wake up in the morning because you can't wait to see what happens next.

但也必须有一些事情让你对未来感到兴奋，让你早上醒来时感到高兴，因为你迫不及待地想看到接下来会发生什么。

And that's the future that SpaceX wants to bring to you.

这就是SpaceX想要带给你的未来。
